  3. By fair market value established by private appraisers acceptable to the city. Credit for the dedication of wastewater facilities land shall be provided when the property has been conveyed at no charge to, and accepted by, the city in a manner satisfactory to the city council.
- b. Applicants for credit for construction of wastewater facilities improvements shall submit acceptable engineering drawings and specifications, and construction cost estimates to the city engineer. The

city engineer shall determine credit for construction based upon either these cost estimates or upon alternative engineering criteria and construction cost estimates if the city engineer determines that such estimates submitted by the applicant are either unreliable or inaccurate. The city engineer shall provide the applicant with a letter or certificate setting forth the dollar amount of the credit, the reason for the credit, and the legal description or other adequate description of the project or development to which the credit may be applied. The applicant must sign and date a duplicate copy of such letter or certificate indicating his agreement to the terms of the letter or certificate and return such signed document to the city engineer before credit will be given. The failure of the applicant to sign, date, and return such document within 60 days shall nullify the credit.

- c. Except as provided in subsection d. below, credit against impact fees otherwise due will not be provided until:
1. The construction is completed and accepted by the city; and

- d. Credit may be provided before completion of specified wastewater facilities improvements if adequate assurances are given by the applicant that the standards set out in subsection c. will be met and if the feepayer posts security as provided below for the costs of such construction. Security in the form of a suitable letter-of-credit or cash bond shall be posted with, and approved by, the city in an amount determined by the city engineer. If the wastewater facilities construction project will not be constructed within one year of the acceptance of the offer by the city engineer, the amount of the security shall be increased by ten percent compounded, for each year of the life of the security. The security shall be reviewed and approved by the city attorney's office prior to acceptance of the security by the city engineer. If the wastewater facilities construction project is not to be completed within five years of the date of the feepayer's offer, the city council must approve the wastewater facilities construction project and its scheduled completion date prior to the acceptance of the offer by the city engineer.

- (2) Any claim for credit must be made no later than the time of application for connection. Any claim not so made shall be deemed waived.
- (3) Credits shall be transferable from one project or development to another.
- (4) Determinations made by the city engineer pursuant to the credit provisions of this section may be appealed to the city council by filing a written request with the city engineer within ten days of the city engineer's determination.

#### Sec. 20-130. Penalty provision.

A violation of this article shall be prosecuted in the same manner as misdemeanors are prosecuted and upon conviction the violator shall be punishable according to law; however, in addition to or in lieu of any criminal prosecution, the city shall have the power to sue in civil court to enforce the provisions of this article and to obtain appropriate injunctive relief.

#### Sec. 20-131. Appeals.

After determination of the applicability of the impact fee, a fee payer may appeal the amount of the impact fee due to the 23rd Judicial District Court. The applicant must file a Petition for Appeal
